EXPLANATORY MEMORANDUM

This Bill seeks primarily to provide for the preparation, promotion and implementation of standards and standard related activities in relation to commodities, goods, services, processes and practices by the establishment and operation of a Bureau of Standards. In general this Bill seeks to make the laws respecting standards compliant with several trade-related international agreements, in particular, the Revised Treaty of Chaguaramas Establishing the Caribbean Community including the CARICOM Single Market and Economy, the World Trade Organization Agreement on Technical Barriers to Trade and the CARIFORUM-EU Economic Partnership Agreement (EPA) between the CARIFORUM States and the European Union.

In that regard, this Bill provides for the continuation of the Bureau of Standards and also seeks to define the powers and functions of the Bureau of Standards and to provide for the repeal of the Standards Act, [Cap. 411]. The functions of the Bureau of Standards includes, among other things, (a) declaring and issuing technical regulations, standards and protocols; (b) monitoring compliance with the technical regulations, standards and protocols; and (c) conducting conformity assessment activities.

A related purpose of this Bill is to provide for free circulation of goods within the OECS Economic Union. In that regard the term “home use” is broadly defined to capture the concept of goods being available to mean being available for free circulation in Antigua and Barbuda and any other Protocol Member State after the import formalities respecting the goods have been completed and the goods have been released from customs control.

Honourable E. P. Chet Greene
Minister of Trade, Commerce & Industry,
